demands for foodgrains to the Central Government for 1993-94. Generally the demands made by most of the States/ Union Territories including Orissa are exaggerated whereas the Central Government makes monthly allocations of foodgrains, taking into account the stocks available in the Central Pool, seasonal availability, relative needs of various States and UTs and other related factors. The Central supply of foodgrains covering about 15 to 18% of the total annual production in the country is, therefore, supplemental to open market availability and is not meant for meeting the entire demands of the States/ UTs. However, irrespective of demands made, Orissa Government is being allocated a quantity of 38,700 MTs of rice and 20,000 MTs of wheat since June 1992.

(a) whether Government have reviewed its buffer stock of goodgrains vis-a-vis expected shortage in procurement during the forthcoming Rabi season; and

(b) if so, whether Government would seriously consider a ban on export of mass consumption items ?

THE MINISTER OF STATE OF THE MINISTRY OF FOOD (SHRI KALP NATH RAI) : (a) and (b). Government constantly reviews the stock position of foodgrains in the Central Pool keeping in view the estimated production and anticipated procurement. Procurement of Wheat

3143. SHRI IQBAL SINGH :
SHRI SURESH PACHOURI :

Will the Minister of FOOD be pleased to state :

(a) what difficulties were faced by Government in the procurement of wheat during the last three years; and

(b) whether Government have prepared any action plan to improve food economy ?

THE MINISTER OF STATE OF THE MINISTRY OF FOOD (SHRI KALP NATH RAI) : (a) The procurement of wheat for the central pool under price support was 110.65 lakh tonnes during the 1990-91 rabi marketing season; 77.52 lakh tonnes during the 1991-92 rabi marketing season; and has been 63.80 lakh tonnes till 12th March, 1993 during the current 1992-93 rabi marketing season.

The main reason for decline in procurement of wheat during the 1991-92 and 1992-93 rabi marketing seasons can be stated as higher open market prices, large scale purchases by the traders; less mandi arrivals; and possible holding back of stocks by farmers in anticipation of higher prices later in the year, etc.
